Our Service

◀ PRINTING MATERIALS (INKS)

Complete range of screen, offset and digital materials (Inks).

◀ CHEMICALS

Different Types of cleanses, adhesives, thinners and retarders.

◀ UV LED FLEXO INKS

LED and UV flexo inks with high gloss and fast curing.

◀ PAD PRINTING

All types of solvent inks for pad printing.

◀ PAPERS AND STICKERS

All types of papers and high quality stickers.

◀ STAMPING FOILS

These materials are used by pressing through heat.

◀ ACCESSORIES

Screen Printing materials used in process from UK and Italy.

1. PRINTING MATERIALS (INKS)

At Al Aoun Trading Company, our Printing Materials category encompasses a diverse range of high-quality products designed to meet the needs of modern printing businesses. We offer comprehensive solutions in screen printing materials, offset printing materials, and digital printing materials. With our extensive industry experience and commitment to excellence, we provide the best materials to support your printing operations and help you stay ahead in the ever-evolving market.

I)- NB II)- NG III)- OP IV)- PY V)- PS VI)- YD VII)- SZK96

2. CHEMICALS

The types of chemicals we have are the

- i)- Cleaner > ZT639, QV017
- ii)- Adhesives > T-FIX, Saati Ultrafix SB4
- iii)- Thinners > ZC521/5, ZV557/5, ZE805/5, ZE637/5
- iv)- Retarders > ZE558/5, ZC529/5, ZE806/5
- v)- Varnish > RV391/15, PY383/1

3. UV LED FLEXO INKS

This offers two advanced flex ink systems: LED and UV. Both systems deliver high gloss and fast curing with a wide range of colors, process inks, metallic shades, and specialist products. They are compatible with various substrates, including synthetic materials (PE, PP, PVC, PET), thermal papers, foils, and standard papers.

Specifications

- ▶ Ultra-fast curing LED system for deeper, more saturated colors
- ▶ Designed for Fujifilm's LED curing system but compatible with others
- ▶ UV system includes flex sleeve whites for shrink sleeves
- ▶ Supports hot foiling and overprinting with thermal transfer ribbons
- ▶ Adhesion to a variety of synthetic and paper substrates
- ▶ Dedicated Pantone color matching system

UV DRY OFFSET INKS

UV Inks Dry Offset are designed for high-speed dry offset machines used in printing on containers, cups, and pails. Suitable substrates include HIPS, treated PP, and HDPE, making them ideal for applications such as paint containers, pails, ice cream, and dairy cups.

4. PAD PRINTING

Ink Series QSPD:

Ideal for container lids made from pretreated PP, PE, and HDPE. These flame-free solvent inks offer excellent adhesion and abrasion resistance.

Ink Series CPDB & CPDC:

Designed for packaging, molded articles, and products made from materials such as acrylic, ABS, HIPS, PVC, and PC. Features include quick-drying oil-based inks and high-abrasion resistance with a gloss finish.

5. PAPERS AND STICKERS

Different types of papers and high quality stickers are available both for indoor And outdoors uses.

PAPERS
